EDUCATION

AWS Certified Solutions Architect - Associate (SAA-C03)

April 2026

Amazon Web Services

California State Polytechnic University - Pomona

December 2023

Bachelor's, Computer Science

PROFESSIONAL EXPERIENCE

Kiddie Kingdom Playground

January 2025 - present

Co-Founder / Software Engineer

Northridge, CA, USA

- Developed and maintained a React and Firebase business management platform supporting transaction processing, scheduling, customer management, and operational reporting.
- Implemented new features, resolved production issues, and performed root-cause analysis to improve application reliability.
- Automated operational workflows and reporting, improving data accuracy and enabling real-time business insights.

SoCalParking

August 2021 - December 2024

Software Engineer (Contract)

Glendale, CA, USA

- Designed and developed a ticketless valet management application (EasyValet) to improve vehicle tracking accuracy and operational efficiency.
- Developed responsive React and JavaScript applications supporting customer-facing and operational workflows.
- Performed testing, debugging, and root-cause analysis to identify software defects and improve application reliability.

Webinos, Inc.

January 2021 - July 2022

Software Developer Intern

Glendale, CA, USA

- Developed and tested web applications using the MEAN and LAMP stacks.
- Built responsive user interfaces using JavaScript, React, HTML, and CSS.
- Participated in code reviews, debugging, troubleshooting, and feature development to improve software quality.

Projects

ULyfe

- Developed frontend features and backend integrations for a scalable React and Firebase student engagement platform.
- Integrated Firebase and AWS services to improve backend functionality and application scalability.
- Implemented testing, debugging, and feature enhancements to improve application reliability and performance.

PropScout

- Developed backend APIs and data processing logic for real-time sportsbook odds aggregation.
- Built data validation features to improve data consistency and reliability.
- Collaborated across frontend and backend development to deliver new application features.

Serverless Event API (AWS + Terraform)

- Built a serverless REST API using AWS API Gateway, Lambda, and DynamoDB, provisioning infrastructure with Terraform.
- Configured IAM roles and permissions to securely allow Lambda access to AWS resources.
- Implemented CloudWatch logging and monitoring to improve debugging and application observability.

Highly Available Web Infrastructure (Terraform + AWS)

- Designed a custom VPC architecture with public and private subnets across multiple Availability Zones.
- Implemented Application Load Balancer to distribute traffic across EC2 instances.
- Automated EC2 instance provisioning with user-data scripts to deploy Apache web servers.
- Designed security groups and network routing for secure internet-facing and internal traffic.

TECHNICAL SKILLS

Programming: Java, C#, C/C++, Python, JavaScript, TypeScript, Flutter, Dart

Web Development: React, Node.js, Next.js, HTML, CSS, Firebase, MongoDB

Cloud & DevOps: Linux, AWS (Lambda, API Gateway, CloudWatch, S3, EC2, VPC, IAM, DynamoDB, ALB, Auto Scaling), Terraform, Docker, Jenkins, GitHub Actions, CI/CD

Data & Analytics: SQL (MySQL, PostgreSQL), pandas, NumPy, Data Analysis, Data Visualization (Tableau, Power BI)

Test & Debugging: Validation Testing, API Validation, Functional Testing, Root Cause Analysis, System Debugging, Troubleshooting, Feature Verification

Systems & Test Environments: JUnit, REST APIs, JSON, Software Validation, Test Case Development

Tools: Git, GitHub, Vercel

Languages: English (Fluent), Armenian (Fluent), Russian (Intermediate)
